    - Embedded Systems 1 (78%)

Skills

Languages: Java, C, Python, JavaScript, HTML, CSS, SQL
Technologies: React.js, MySQL, Bash, Git, Javafx, Firebase, Swing, Android studio, Linux

Projects

- I build a tesla clone website using react. This helped me understand how companies implement the UX to make customers stay longer on the site. https://github.com/MinasFakhori/tesla-clone.git
- I developed on top of a pre-build javafx banking application. This helped me with understanding and working with pre-existing code. This was a part my first-year university work and I got 96% for that assignment. https://github.com/MinasFakhori/bankATM.git

Awards

Institution of Engineering and technology Sussex network award – For the most meritorious performance 2021 in the first year of electronic engineering.
